

Lynda  
Stouffville

I have an older home and if you own one you know they always need repairs of some kind or another. I found Greg's phone number in our local Stouffville newspaper. We immediately made an appointment for him to review what needed to be done.

Over the past few months, Greg has insulated my basement, built storage shelves, removed an old oil burner, installed a French door, and installed a new kitchen counter top and backsplash. He even removes your junk and takes it to the dump.

Greg always prepares a detailed quote for each project, so you do not have any surprises - you know exactly what is being done and the cost.

From the moment I met Greg I had a good feeling and saw the confidence he had, this man I believe can do anything. In addition he does each and every project with great care and excellent skill.

I'm working through a very long list of projects and I couldn't recommend anyone better than, Greg.

Give him a call... he's very approachable and you will not be disappointed.
